

CONTRACT FOR YARD WASTE PROCESSING

This contract entered into on this date February 12, 2001, by and between Nassau County Board of County Commissioners (County) (herein after referred to as "County"); and Sandhill Recycle Center, Inc. (herein after referred to as "Company"). The parties agree as follows:

Scope of Work

Company shall provide all equipment and personnel required to process vegetative yard waste into a usable mulch. All sizes of incoming yard waste will be processed under this agreement including stumps, limbs, and wood debris from trimming operations. All equipment utilized on this project will be delivered to and from and transported between each site by Company solely at its cost. In the event that contaminants such as rock, buck, metals, concrete, plastic, dirt, etc. is present in the material to be processed, every effort will be made to remove them before or during processing. They will be separated at each site for disposal by the County.

All processing to be done on a "On Call" basis with a minimum of 10 working days notice being given by the County before work is scheduled to begin. In the event of an emergency or a natural disaster, Company shall respond to the County's request for services immediately. Prior to beginning processing, the County shall submit to Company all incoming scale weights (tonnage) for all yard waste to be processed that was received at the Site since the last time such material was processed. Company and the County shall agree to the weight present to be processed. This weight shall be used to invoice the County for processing services, including the weight of all yard waste received and processed while Company is processing the Site.

In the event that incoming scale weights are not available; prior to beginning processing, the County and Company shall measure the accumulated yard waste piles in order to determine Cubic Yard measurement for billing purposes. The method of measurement will be based on determining the length, width, and average height of each pile of material in feet, multiplying these numbers, and dividing by 27 cubic feet per yard. The resulting number will determine the cubic yards of material to be processed and this number will be used by Company for billing purposes. Material will not be compacted with machinery at the landfill prior to measurement.

Company shall submit an invoice to the County within 10 days after completion of the processing of all accumulated yard waste material at the site. The invoice shall contain the dates the material was processed, the measured volume as determined by the above method and the amount owed for the service based upon the prices listed below. The County shall pay Company for these service based on this invoice within 30 days if receipt of the invoice.

Price per Ton (As determined by the above Weight method)	\$7.50
