All sizes of incoming yard waste will be processed under this Agreement including stumps, limbs, and wood debris from trimming operations. All equipment utilized on this project will be delivered to and from and transported between each site by Company solely at its cost. In the event that contaminants such as rock, buck, metals, concrete, plastic, dirt, etc., is present the County shall remove them before or during processing. They will be separated at each site for disposal by the County.

All processing to be done on an "On Call" basis with a minimum of 10 working days notice being given by the County before work is scheduled to begin. In the event of an emergency or a natural disaster, Company shall respond to the County's request for services immediately. The method of measurement will be based on determining the length, width and average height of each pile of material in feet, multiplying these numbers, and dividing by 27 cubic feet per yard.
