WHEREAS, the County desires to obtain continuing consulting professional services on an "as needed" project-by-project basis; and

WHEREAS, said services are more fully described in Schedule "A" "Scope of Services", which is attached hereto and made a part hereof; and

WHEREAS, the Consultant has submitted a proposal for providing those services; and

WHEREAS, the consultant represents that it has the expertise in the type of professional services required; and

WHEREAS, the County has chosen three (3) consultants to provide services, and the Consultant is one of the three.

In consideration of the mutual promises contained herein, the County and the Consultant agree as follows:

**ARTICLE 1 - SERVICES**

The Consultant's responsibility under this Contract is to provide professional/consultation services in the area of professional geotechnical and laboratory services, as more fully described in Schedule "A" "Scope of Services" attached hereto, and to perform and complete the work specifically set forth in each task set forth herein.

The Work shall be performed on an "as needed" basis per project and by task order to this contract. Each Task Order shall be approved by the Board of County Commissioners.

Services of the Consultant shall be under the general direction of a County representative, as determined by the Board of County Commissioners, to be identified in each task order, who shall act as the County's representative during the performance of this Contract.

**ARTICLE 2 - SCHEDULE**

The County and the Consultant shall mutually agree upon each schedule which will become a part of each task

order. All reports shall coincide with County requirements.

**ARTICLE 3 - PAYMENTS TO CONSULTANT**

A. The County shall pay to the consultant for services satisfactorily performed as follows: The Consultant will bill the County on a monthly basis or as otherwise provided and at the amounts set forth in the Contract Addenda for services rendered toward completion of the Scope of Work. The amounts billed shall represent the approximate completion of services outlined in the Scope of Work contained in various task orders. The invoice shall be paid within forty five (45) days and pursuant to Section 218.70, Florida Statutes, the Florida Prompt Payment Act.

B. Invoices received from the Consultant pursuant to this Contract will be sent to the Clerk, indicating that services have been rendered in conformity with the task, and the Clerk will provide the invoice to the appropriate County Department for review and recommendation(s) as to payment. Invoices must reference this Contract and the task order against which the Consultant is billing.

C. Final Invoice per Task Order: In order for both parties herein to close their books and records, the Consultant will clearly state "final invoice" on the Consultant's final/last billing to the County, this

indicates that all services have been performed and all charges and costs have been invoiced to the County and that there is no further work to be performed on the specific task order.

D. Contract Task Order: Each task order shall have its own specific value on a "stand alone" basis.

E. Labor Unit rates shall be established at the beginning of this Contract and may be adjusted annually upon consent of the County beginning with the next task order issued after the anniversary date of the Contract. The labor unit rates are set forth in Schedule "C".

The said rates and costs shall be reduced to exclude any significant sums should the County determine that the rates and costs were increased due to inaccurate, incomplete, or non-current wage rates or due to inaccurate representations of fees paid to outside consultants. The

County may exercise its rights under this Article within one (1) year following final payment.

**ARTICLE 5 - TERMINATION**

This Contract may be terminated by the County upon thirty (30) days' prior written notice to the Consultant.

No single or partial exercise of any party or any right, power, or remedy hereunder shall preclude any other or further exercise thereof.

In any action brought by either party for the enforcement of the obligations of the other party, the prevailing party shall be entitled to recover reasonable attorney's fees.

**ARTICLE 22 - AUTHORITY TO PRACTICE**

No task orders and/or modifications of this Contract shall be valid unless in writing and signed by each of the parties. All amendments and modifications shall be in the form of a change order or task order.

The County reserves the right to make changes in the work, including alterations, reductions therein or additions thereto. Upon receipt by the Consultant of the County's notification of a contemplated change, the Consultant shall: (1) if requested by the County, provide an estimate for the increase or decrease in costs due to the contemplated change; (2) notify the County of any estimated change in the completion date; and (3) advise the County in writing if the contemplated change shall effect the Consultant's ability to meet the completion dates or schedules of this Contract.

If the County so instructs in writing, the Consultant shall suspend work on that portion of the work affected by a contemplated change, pending the County's decision to proceed with the change.

If the County elects to make the change, the County shall issue a task order for changes to a task in progress or a contract change order if the original contract is being changed or amended, and the Consultant shall not

commence work on any such change until such written task order or change order has been issued and signed by each of the parties.

Attention: Ms. Charlotte Young

Subject: **PROPOSAL FOR GEOTECHNICAL ENGINEERING SERVICES**  
14<sup>th</sup> Street and Beech Street Signal  
Fernandina Beach, Florida

---

Dear Ms. Young:

As requested, Universal Engineering Sciences (UES) is pleased to provide this proposal to perform the geotechnical exploration and engineering services for the subject project.

### **PROJECT INFORMATION**

Project information was provided to us in your letter dated July 12, 2006. We understand that this project will consist of constructing one mast arm at the subject site. We will provide you with the soil parameters needed to determine foundation design parameters. We understand these calculations will be performed by others. We also understand that the design will be in accordance with Florida DOT standards.

### **PROPOSED GEOTECHNICAL EXPLORATION**

The objective of this geotechnical exploration is to provide sufficient site and subsurface information to evaluate the subsurface conditions at the site with respect to the proposed cantilever sign construction. It is assumed the boring location is accessible to our truck-mounted drilling equipment and that you will stake the boring location prior to our arrival at the site.

**Field Exploration** - Based on our understanding of the project information we propose to perform one (1) standard penetration test (SPT) boring to a depth of 30 feet below the existing ground surface.

**Laboratory Testing** - Laboratory classification and index property tests will be performed as necessary on selected soil samples obtained from the exploration. The testing will be performed to better define the materials encountered in the exploration and to determine their strength/compressibility characteristics. In addition, corrosion series testing will be performed on selected soil samples in accordance with Florida DOT standards.

**Engineering Services** - A geotechnical engineer, registered in the State of Florida, will direct the geotechnical exploration and provide an engineering analysis and evaluation of the site and subsurface conditions with respect to the planned construction and imposed loading conditions. The results of the recommended exploration and engineering study will be presented in a report containing the following:

1. A brief discussion of our understanding of the planned construction and imposed loading conditions.
2. A presentation of the field and laboratory test procedures used and the data obtained, including preparation of FDOT Core Boring Sheets.
3. A presentation of the subsurface conditions including subsurface profiles, estimated seasonal high groundwater, and estimated geotechnical engineering properties (as necessary) for use by others for foundation design.

### **COMPENSATION FOR SERVICES**

Based on the scope of the geotechnical exploration, the proposed laboratory testing, and the engineering services outlined above, we propose to complete the geotechnical exploration and engineering services for a lump sum fee of **\$1,691.00**. We will contact you immediately if we encounter subsurface conditions which could require (1) the borings to be performed to deeper depths, (2) additional borings or other field testing, and/or (3) additional engineering analysis/evaluation and studies outside the scope of this proposal. Attached is the Fee Schedule (Exhibit 1) with the applicable unit rates for this project.

### **SCHEDULING AND AUTHORIZATION**

We can initiate the geotechnical exploration within five days of notification to proceed with the field work to be completed in one day. As soon as all field and laboratory tests have been completed and reviewed by the geotechnical engineer, verbal results and recommendations can be provided. The written report should then be available for your review within three weeks of formal authorization to proceed.

We understand you will authorize our services by a task order under our continuing

services contract.

We appreciate this opportunity to provide this proposal to perform the geotechnical exploration for this project. If you have any questions concerning this proposal or if we can serve you in any other way, please contact us.

Respectfully submitted,

**UNIVERSAL ENGINEERING SCIENCES**
