Measure 6. No more than 54 children will be in out-of-home care 12 months or more on June 30, 2007.

Methodology

Definitions	"Out-of-home care" means care for children in an active removal episode (between removal date and discharge date), regardless of placement type or custodian, including those in licensed board-paid foster care and kinship (relative and non-relative) care.
Algorithm	This measure is a count of the children in out-of-home care who have been in out-of-home care 12 months or more.
Data Sources	Protective Investigators and CBC staff enter case management, removal and discharge data into the HomeSafenet database.
Data Process	HSn data are extracted from the HSn production database and placed in the data repository nightly. An HSn report program uses repository data to produce a report, "Children in Out-of-Home Care by Time in Care." Online user documentation is available in HSn. Written report specifications are available upon request.

Baseline and Target

	Number of Children in Out-of-Home Care More than 12 Months
Baseline	59
Performance Target	54

Measure 7. The number of finalized adoptions.

Methodology

Definitions	An adoption is considered final on the date the Court enters the verbal order finalizing the adoption.
Algorithm	This measure is a simple count of the number of children whose adoptions were finalized. Annual contract performance is the number of children whose adoptions were finalized during the fiscal year period.
Data Sources	CBC providers.
Data Process	Data are entered into HomeSafenet by direct services staff as they work with families. Data are extracted from the HomeSafenet production database and copied to the data repository nightly. An HSn report program uses repository data to produce a report titled "Adoptions Finalized by Month & Cumulative for State Fiscal Year," which is updated weekly. Online user documentation is available in HSn. Written report specifications are available upon request.
