To protect members of the fund from large losses and to protect the financial security of the fund, the PGIT board of trustees has elected to purchase an extremely conservative excess of loss insurance structure. We stress PGIT excess of loss structure because an excess structure provides PGIT members several levels of protection that reinsurance does not.

Foremost among these is the fact that PGIT's excess of loss policies list every individual member a named insured, giving every member direct access to the insurance company for payment of claims. Reinsurers are only responsible to the trust itself. Therefore, if a trust became financially troubled, there is no guarantee from an insurance company that any individual claim will be paid or even that a reimbursement will go towards the originating claim.

PGIT is a non-assessable Trust authorized under Florida Statute and is not rated by AM Best. PGIT is not protected by the Florida Guarantee Association in the event it becomes unable to meet its claims payment obligations. PGIT members are not constrained by notice requirements or punitive run-off claims costs to exit.
