Mr. John Ramsay Crowder Gulf 5435 Business parkway Theodore, Alabama 36582

Re: Notice to Proceed (NTP): CrowderGulf

Dear Mr. Ramsay,

Nassau County, FL awarded CrowderGulf a contract to perform debris removal services in accordance with Bid Contract # CM1665 dated October 11, 2010.

Nassau County activated your contract on June 5, 2012 to assist with debris removal as a result of Tropical Storm Beryl.

The Nassau County Board of County Commissioners approved on June 25, 2012 to extend your activation to provide mechanical beach cleaning of abiotic and natural marine vegetation accumulation along shoreline. On the basis of this action, you are authorized to proceed in accordance with the terms and conditions of Contract #CM1665. In addition, all work must be in compliance with the attached permit issued by the Florida Department of Environmental Protection (FDEP), Permit Number 8027382.

"Notice to Proceed" is hereby given and accepted by the signature below.

Nassau County, FL

Beach Cleaning Permit Conditions For All Counties Excluding Brevard Through Broward And Monroe County (8/15/95) (06/12/02)

SPECIAL PERMIT CONDITIONS Pursuant to Rule 62B-33.005(11), F.A.C. Field Permit No. 8027382 - NA

- 1. During the marine turtle nesting season (May 1 to October 31), mechanical beach cleaning activities shall be confined to daylight hours (sumrise to sunset).
- 2. During marine turtle nesting season (May 1 to October 31), the permittee is responsible for ensuring that a daily marine turtle nest survey, protection, and monitoring program is conducted throughout the permitted beach cleaning area. Such surveys and associated conservation measures shall be completed after surrise and prior to the commencement of any mechanical beach cleaning. The marine turtle survey, protection, and monitoring program shall be conducted only by individuals possessing appropriate expertise in the protocol being followed and a valid F.A.C. Rule 68E-1 Permit issued by the Florida Fish & Wildlife Conservation Commission (FWC).
- 3. In the eventithat mechanical beach cleaning occurs prior to completion of the marine turtle nest survey, protection, and monitoring program, mechanical beach cleaning shall not occur landward of the wrack or debris line on that beach until 65 days have passed or after November 30, whichever is earlier. The permittee shall contact the Marine Turtle Permit Holder prior to reinitiating mechanical beach cleaning in that area. [
- 4. All nests left in place shall be marked with a circle of tape or string having a radius of at least three (3) feet, centered at the approximated location of the clutch. An additional marker shall be placed at the base of the dune or sealvall to ensure that future location of the nests will be possible should the on-beach markings be lost. No mechanical cleaning equipment is allowed inside of this circle; however, careful removal of material by hand is allowed. All equipment operators should be briefed on the types of marking utilized and should be able to easily contact the individual responsible for the nest survey to verify any questionable areas.
- 5. In the event that on-beach nest markers are lost for any reason, including vandalism or high water conditions, no mechanical beach cleaning shall be conducted until the marine turtle permit holder identifies the nest and restores the markers. In the event that the nest cannot be found and may have been lost during high water conditions, the permittee shall contact FWC staff at (850) 922-4330 to determine if mechanical beach cleaning can resume. All marine turtle protection conditions shall remain in effect unless specifically waived in writing by FWC.
- 6. In order to avoid adverse impacts in the event that cleaning accidentally occurs over a nest, mechanical beach cleaning equipment shall not penetrate more than two inches into the surface of the beach. This permit authorizes the use of a vehicle with a maximum tire pressure of 10 p.s.t. and a rake or cleaning apparatus that limits penetration into the surface of the beach to a maximum of two inches. Box blades and front or rear the mounted blades are not authorized. No other types of vehicles may be operated on the beach pursuant to this penuit. Mechanized beach cleaning shall be accomplished so that no ruts are formed on the beach.
- Burial or storage of any debris (biotic or abiotic) collected is prohibited seaward of the 50 foot setback. Removal of accumulated debris from the beach must occur immediately after cleaning has been performed.
- 8. Operators of mechanical beach cleaning equipment shall avoid all native, sait tolerant dune vegetation by a minimum of 10 feet.
