SERVICE MAINTENANCE

Thor Guard is a vital safety device and an integral component of your daily operations. Keeping your THOR GUARD lightning prediction and warning system operating properly is critical. This equipment needs to be maintained on a regular basis. The primary purpose of this maintenance program is to perform a complete and thorough system analysis four to six times annually, frequency defined by the environmental conditions in your geographic area. The following service procedures will be performed as part of this service agreement.

- Thorough cleaning of Hyper-Static sensor (located on roof)
- Diagnostic test of base system to ensure proper working order
- Diagnostic test of remote horn locations
- Battery load test at base and all remote locations
- Compression check and horn test at all locations
- Transmitter and receiver check
- Up-grade system circuit board chips as necessary to improve performance
- Provide additional training, if needed

Please note that the primary purpose of this agreement is to ensure that all aspects of your lightning prediction and warning system are operating properly on the day of each service call. The customer, however, is responsible for ordinary facility general maintenance involving their Thor Guard system in order to guarantee that it is operating on an every-day basis. Neither Thor Guard nor the Service Agent is responsible for any disruption of service due to normal wear and tear after this maintenance service agreement is completed.

The pricing for the six month PREVENTATIVE MAINTENANCE Package is \$237.50 per site. The covered sites are Bryceville Park, Hilliard Park, Callahan Park, Peter's Point Beach, American Beach, and Yulee LL.

The current term begins April 1, 2014 and ends September 30, 2014. This agreement shall automatically renew for successive one year periods under the same terms and conditions unless terminated by either party with written notice thirty (30) days prior to the expiration of the current term. Prices are subject to change upon each renewal. Any price changes will be provided to customer ninety (90) days prior to the end of the current term. This agreement may be modified upon mutual agreement of both parties in writing.

In addition to the scheduled visits to your facility for preventive maintenance, I will be available for on-call service in the unlikely event of any system failures. Note: This agreement excludes all parts and/or non-preventative maintenance repair labor.
