ADDITIONAL PRODUCT ENDORSEMENT

Upon execution by both parties, the License And Service Agreement, (Agreement), by and between Comprise Technologies, Inc, (Comprise) located at 1041 Route 36, PO Box 425, Navesink, New Jersey 07752 and the Licensee listed below is hereby amended as follows:

Licensee desires to obtain the right to use Smart Alec™ which is Comprise proprietary technology and information, in connection with the Licensee's business operations. The purpose of this Endorsement is to license this additional product to Licensee.

This additional product shall be defined as capable of performing the functions and consisting of the components on the literature scheduled below and on the attached Cost Proposal, all of which shall be provided by Comprise unless otherwise specified.

Smart Terminal – STO_126

Cost And Payment

Smart Terminals for SMM Application	<u>Initial Cost</u>	<u>Renewal</u>	<u>Proposal #</u>
	4,670	932	7688.9

Payment as set forth in the attached Cost Proposal shall be due upon delivery unless otherwise specified herein. Licensee may obtain additional quantities according to the unit costs set forth in the Cost Proposal or a mutually acceptable pro-rata computation of unit costs if not specified.

License

Licensee is granted a non-exclusive, nontransferable end user license to use this additional product in the normal course of Licensee's business. Licensee is authorized to make copies of the software and any associated documentation provided by Comprise so that Licensee has sufficient copies to support its use of the product. Such use is restricted to Licensee's facilities or the facilities provided to Licensee by Comprise.

Other

If this additional product can be used to process payments by credit card, debit card, and/or check, this Endorsement must be executed along with a "PAYMENT CARD INDUSTRY DATA SECURITY STANDARD AMENDMENT".

Entire Endorsement

This Endorsement documents the entire agreement between the parties and shall supersede and merge all prior and contemporaneous communications, understandings and agreements with respect to the subject matter hereof.

Description of Commodity:
Software License and hardware from Comprise to accept credit card payments at four branch libraries

Check one (1) of the following two (2) choices:

XX Sole Source: The goods or services can be legally purchased from only one source.

Single Source: The goods or services can be purchased from multiple sources, but, in order to meet certain functional or performance requirements, there is only one economically feasible source for this purchase.

Please check all of the following that apply:

XX Purchase can only be obtained from original manufacturer-not available through distributors.

Only authorized area distributor of the original manufacturer.

Parts/Equipment are not interchangeable with similar parts of another manufacturer.

This is the only known source that will meet the specialized needs of this department or perform the intended function.

This source must be used to meet warranty or service maintenance requirements.

This source is required for standardization.

None of the above apply.

Comments/Explanations: (required)

Comprise is the sole proprietor of the SMARTPAY software and the only company that can support their product.

Empowering Patrons – Liberating Librarians

April 1, 2020

Nassau County Public Library System
25 North 4th Street
Fernandina Beach, FL 32034

To Whom It May Concern:

RE: Sole Source Certification

Comprise Technologies, Inc. (Comprise) is pleased to submit this document in support of your sole source consideration of Smart Money Manager POS, Smart Terminals, and SmartPAY, collectively referred to as the **Smart Payment System**. Comprise's **Smart Payment System** is a PCI-DSS compliant product for transactions at any point-of-interaction in a public library. Comprise is the only company that has developed the proprietary solution as described herein.

Product Description

The heart of **Smart Payment System** is SmartPAY, an independently PCI-DSS accredited Internet "Gateway" equipped with proprietary software enabling two-way communication among system points-of-interaction, Patron Library Record, **exclusively with its' Smart Database**, and your payment card processor. The architecture of **Smart Payment System** enables the library to validate its' own PCI compliance with the lowest permitted effort while, at the same time, providing the library with the highest quality reporting of all payment transactions.

Smart Payment System offers the library a patron self-service and/or staff-assist payment method:

1. SmartPay (online),
2. Smart Money Manager POS (over-the-counter),
3. Smart Terminals used with Smart Money POS

The components of the Smart Payment System, combined with our Smart Reports, provide libraries with the only unified payment system in the industry.

Feature Set Available Solely Through Smart Payment System

Library System Charges – Communicates with ILS products to display in line item detail and process real time payment for fines or other service charges.

Comprise has under their employ, Software Developers, Technical Support, Remote Software Implementation and On-site Implementation staff that support our customers for New Installs, Maintenance and Upgrades. Comprise is the only source for the development of our proprietary Smart software as well as the support and maintenance of the SAM Software and all hardware devices that integrates with the SAM software.

Since Comprise is the sole developer of **SmartPAY, Smart Money Manager POS software along with our integrated Smart Terminal credit card reader**, we are also the only company that can support the integration to meet the needs and configuration requirements of each customer.

We look forward to the opportunity to serve your Library.

Sincerely,

Dan Curtin

Comprise Technologies, Inc.

The Payment Card Industry Data Security Standard

The PCI Data Security Standard (PCI-DSS) represents a common set of industry tools and measurements to help ensure the safe handling of sensitive information. Initially created by aligning Visa's Account Information Security (AIS) Cardholder Information Security (CISP) programs with MasterCard's Site Data Protection (SDP) program, the standard provides an actionable framework for developing a robust account data security process - including preventing, detecting and reacting to security incidents. The first version, developed by the founding members of the PCI Security Standards Council, became effective with the launch of the PCI Security Standards Council in 2004.
