**Subject: Bid No. NC19-016 (GAI B190839.00) William Burgess Blvd
Extension Additional Scope of Work**

Dear Mr. Companion,

As requested, GAI will provide additional task scope of work services that will be accommodated under the current contract. The work includes detail below and staff hour details attached.

1. Task 1 - Utility related changes:

- Modify the roadway alignment to increase clearances for reuse watermain to remain inside permanent easement (STA 72+00 to STA 102+00) and reuse line crossing (STA 65+65). The change avoids impacting reuse line, which would result in utility reimbursable condition. Also, added efforts in coordinating w JEA reuse plant site, to determine drainage overflow into County drainage system to accommodate JEA SJRWMD permit (roadway blocks drainage ree due to ROW area purchased from JEA) Note: All JEA utility valve and manhole adjustments in the permanent easements are pay items to be listed under County bid item list. Affected plan profile and drainage structure designs.
- Modify drainage around gas main, due to Gas company not being able to properly locate this line and GAI SUE work also falling short in the location reviews. To avoid the risk of running into this GAS, the following drainage structure design was shifted from north side of roadway to south side of roadway. Inlets affected include S-81, S-82, S-83, S-84, S-85, S-86. Redesigned conveyance system affecting plan, profile, and drainage structure sheets.
- Modify drainage and review JEA permits/calculations to assist in meeting permit conditions, due to new roadway conflicting w JEA property outfall. Review options and implement drainage design changes. Affected plan, profile and drainage structures.

Cost: \$25,490.

Bid No. NC19-016 Scope and Fee Change (GAI B19039.0)

Date: 1-11-2023

2. Task 2 - FDOT Permit Related: Redo drainage to maximize drainage piping from US 17 to Pond A. Affects inlets S-1, S-2, S-3, S-5, S-7, S-9, S-11, S-12, S-13, S-14, S-15, S-16, S-16A and S-16B. Affected plan, profiles, drainage structures sheets and cost estimates. Added coordination with FDOT (planning, design, permits and project management departments). Cost: \$15,280.
3. Task 3 - SJRWMD Permit: SJRWMD requested additional assessments to prove up slope stability of the ponds, due to adjacent ground elevations. This work is not typical, however the water management wanted added proof. Also, water management wants proof that wetlands are not being affected by the stormwater ponds, therefore the added geotechnical analysis is required. GAI drainage analysis and plan details are affected. Cost \$11,960 Task includes geotechnical services. Cost \$8,226.
4. Task 4 – Lighting/FPL Coordination: Coordination with FPL on lighting options (lighting and distributions departments). County new standard , add lighting plan production sheets and electrical engineering for FPL service detail connections (two locations).Cost \$15,430

The total cost of these changes is \$76,386. Above changes will be completed within approved schedule. Please if you have any questions or need additional information related to this proposal, do not hesitate to contact me.

Sincerely,

Ronald Hoogland, P.E.
Project Manager
