### **I. SPORTS LIGHTING – LIGHT-STRUCTURE GREEN™ SYSTEM**

#### **A. BASE BID LIGHTING EQUIPMENT**

The primary goals of this sports lighting specification are:

- 1. Life Cycle Costs: In order to reduce the operating budget, the preferred lighting system shall be energy efficient and cost effective to operate. All maintenance costs shall be eliminated, and the fields should be proactively monitored to detect fixture outages over a 25 year life cycle. To allow for optimized use of labor resources and avoid unneeded operation of the facility, customer requires a remote on/off control system for the lighting system.
- 2. Environmental Light Control: It is the primary goal of this project to minimize spill light and glare.
- 3. Guaranteed Light Levels: Selection of appropriate light levels impact the safety of the players and the enjoyment of spectators. Therefore the lighting system shall be designed such that the light levels are guaranteed for a period of 25 years.

#### **B. LIGHTING PERFORMANCE / PLAYABILITY**

The manufacturer shall supply lighting equipment to meet the following performance and life cycle cost criteria:

- 1. Playing surfaces shall be lit to an average constant light level and uniformity as specified per the bid sheet. Light levels shall be held constant for 5000 hours. Lighting calculations shall be developed and field measurements taken on the grid spacing with the minimum number of grid points specified on the bid sheet. Measured average illumination level shall be +/- 10% of predicted mean in accordance with IESNA RP-6-01, and measured at the first 100 hours of operation.

2. Manufacturer shall provide computer models guaranteeing light levels on the field for 25 years with a recoverable light loss factor of .7 in all applications.

### **C. LIFE CYCLE COST**

1. Energy Consumption: The kWh consumption for the field lighting system shall be calculated by the following criteria:  
# luminaries x kw demand x kw rate of .22/hr x annual usage of 400 hours x 25 years. Tennis courts, skate parks, roller hockey and outdoor basketball courts will be based on an annual usage of 1,000 hours.
2. Complete Lamp Replacement: Manufacturer shall include the appropriate number of group lamp replacements to be completed at end of each 5000 hours of operation. For the purpose of the bid, it is assumed that the field(s) will be operated 400 hours per year or 10,000 hours during a 25 year period. Manufacturer shall warrant the system to meet designed light levels upon completion of these relamps.
3. Preventative and Spot Maintenance: Manufacturer shall provide all preventative and spot maintenance, including parts and labor for 25 years on the system from the date of equipment delivery. Lamp outages shall be repaired when they materially impact the usage of any field. Owner agrees to check fuses and maintain as necessary in the event of a fixture outage prior to calling the manufacturer.
4. Remote Monitoring System: System shall monitor lighting performance and notify manufacturer if individual luminaire outage is detected so that appropriate maintenance can be scheduled. The manufacturer shall notify the owner of outages within 24 hours, or the next business day. The controller shall determine switch position (Manual or Auto) and contactor status (open or closed).
5. Remote Lighting Control System: System shall include lighting contactors. System shall allow owner and users with a security code to schedule on/off system operation via a web site, phone, fax or email up to ten years in advance. Manufacturer shall provide and maintain a two-way TCP/IP communication link. Trained staff shall be available 24/7 to provide scheduling support and assist with reporting needs.

The owner may assign various security levels using a user code and password to schedulers by function and/or fields. This function must be flexible to allow a range of privileges such as full scheduling capabilities for all fields, to only having permission to execute "early off" commands by phone or extend the field usage.

On site equipment shall include Manual Off-On-Auto Switches to allow for maintenance, and shall accept and store 7-day schedules. The controller shall be protected against power outages / memory loss and shall reboot once power is regained and execute any commands that would have occurred during outage.

6. Management Tools: Manufacturer shall make available a web-based database of actual field usage and provide reports by facility and user group.
7. Communication Costs: Manufacturer shall include communication costs for operating the controls and monitoring system for a period of 25 years.

<b>Part II For Payees Exempt From Backup Withholding</b> (See the instructions on page 2.)																																															

## Part III Certification

Under penalties of perjury, I certify that:

- The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
- I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding.

**Certification Instructions.**—You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. (See the instructions on page 2.)

Sign Here	Signature ▶ <b>W. Dancy Buckman</b>	Date ▶ <b>11/24/2008</b>
-----------	-------------------------------------	--------------------------

**Purpose of Form.**—A person who is required to file an information return with the IRS must get your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 to give your correct TIN to the person requesting it (the requester) and, when applicable, to:

- Certify the TIN you are giving is correct (or you are waiting for a number to be issued),
- Certify you are not subject to backup withholding, or
- Claim exemption from backup withholding if you are an exempt payee.

**Note:** If a requester gives you a form other than a W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

**What Is Backup Withholding?**—Persons making certain payments to you must withhold and pay to the IRS 31% of such payments under certain conditions. This is called "backup withholding." Payments that may be subject to backup withholding

include interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

If you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return, payments you receive will not be subject to backup withholding. Payments you receive will be subject to backup withholding if:

- You do not furnish your TIN to the requester, or
- The IRS tells the requester that you furnished an incorrect TIN, or
- The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only), or
- You do not certify to the requester that you are not subject to backup withholding under 3 above (for reportable interest and dividend accounts opened after 1983 only), or

5. You do not certify your TIN when required. See the Part III instructions on page 2 for details.

Certain payees and payments are exempt from backup withholding. See the Part II instructions and the separate Instructions for the Requester of Form W-9.

## Penalties

**Failure To Furnish TIN.**—If you fail to furnish your correct TIN to a requester, you are subject to a penalty of \$50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

**Civil Penalty for False Information With Respect to Withholding.**—If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a \$500 penalty.

**Criminal Penalty for Falsifying Information.**—Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

**Misuse of TINs.**—If the requester discloses or uses TINs in violation of Federal law, the requester may be subject to civil and criminal penalties.

I was unable to contact Play It Safe. Their phone number is no longer in service and I had no success locating them on the internet.

The first company listed on the Bid Recommendation Sheet, Qitele Playgrounds, is actually Site Creations.

Please call me should you have any questions.

Hello Todd,

Back in 08/09 Site Creations submitted a proposal for the above subject bid. It is time to renew that bid, effective for 12 months beginning January 2012.

Your bid allowed specific discount off of the MSRP, using your current catalogues pricing.

If Site Creations would like to extend this bid for an additional 12 months please respond with an e-mail to that effect, referencing Bid #08/09-3, and that you are agreeable to the same terms and conditions.

I look forward to hearing from you!
